About This Game

You have been a knight. You have been a gladiator. Now, for the first time in Swords and Sandals, you are a PIRATE!

Join us on the grandest adventure of all in *Swords and Sandals Pirates* the latest epic chapter in the hugely popular game series!

The Four Oceans War is upon us, and it is time to board a ship, set sail and claim your stake of the Tritonian Oceans.

This is a pirate themed RPG / strategy unlike any other. One part Civilization, one part Ancient Art of War, one part Monkey Island, *S&S Pirates* sees you control one of ten famous sea captains, compete for islands, build ships, fight battles on land and sea, duel in arenas and on masts, search for treasure and try to avoid mutinous crews on your quest to gain control of Tritonia's massive oceans.

Swords and Sandals Pirates is by far the biggest and most tactical of all the S&S games. For fans of 2008's S&S Crusader, you'll

love this spiritual sequel to the classic wargame. For newcomers to the series or fans of pirate games in general, you'll find this game sometimes fun, sometimes hilarious, sometimes challenging but always infinitely replayable!

What are you waiting for? Your ship is waiting for you, the time has come to lay your claim to the Four Oceans and become the greatest pirate captain of all.

Like this if ROTK's profile makes you cry everytime. BibleThump.. A fun casual game if you are interested in building your own city.. "I have to go clear across the city with these goods! It'll take all day..."

Seriously though, this game was one of the first I ever truly fell in love with. I've taken such care of my Pharaoh CD over the decades! ... but I had to get it here too. Even after playing countless hours and beating every mission on hard or very hard (because Qedesh will never be beaten on very hard, I don't care what you say :P), it's still a game I love to sit down to and spend an afternoon on.. oh god i wasted 2 hours on this QQ. What a game! If your a fan of Shoot em Ups and have been looking for something to fill that void this game is awesome. Graphics are good gameplay is better.

There's actually alot in this title, in my opinion well worth the money. I've tried a couple of direct coin op ports and found them very lacking, but this doesn't at all.

I would highly recommend.

. i like it so far seems like a game that has some potential for replayability from what ive played.

I wrote that about an hour in after my first night of playing i reset my world about 6 times and im now into the 5th city this game is a masterpiece that i cant wait to see the end of.. This is truly an excellent game so long as you recognize it for what it is, that is, an old school indie game, the graphics are not great nor is the story, but the gameplay is hilarious and provided me and my buddies some fun over the weekend, overall, definately worth the two bucks. 10/10. I'd seen physical copies of Khet in local board game shops, and somehow the 'laser' aspect had managed to put me off. I liked the Egyptian theme, and am a huge fan of more abstract puzzle-style games such as chess, Go, and Hive. I bought Khet on a whim when I saw that it had support for Linux, and have had a huge amount of fun playing it.

The game is very easy to pick up, and you quickly get drawn into plotting out future moves and paths. I very quickly beat the AI on the lowest two levels, but have yet to take on the higher skill levels.

The client itself, from the same developer as the also-excellent Hive, is very well done. I'd add a slight wish for keyboard controls that don't rely on the number pad, to support us laptop users, but that's a very minor complaint.

All in all, a well-written version of a very fun game, at a low price. Highly recommended..

<https://www.youtube.com/watch?v=JFUtZ-gwMnI>. A change-your-environment platformer that falls short. The music, graphics and voice acting are charming and at times suspenseful. As the game progresses the plot seems to stall while focus on the game mechanics grows. Something about the cohesion of the game seems off and overall it is difficult to stay interested.

The input on a controller is soft. This is a problem half way through the game when a level suddenly requires more precision platforming that is essentially on rails. If you have a D-Pad like that of the X-Box controller, any input other than exactly right or left seems to cancel your jump trajectory. That is infuriating and forces the use of the analog stick.

Literally the worst game I have ever played, both in entertainment and technicality.

I know its been a while, but this game was so bad I still remember it for how awful it truly was.. Had a few minor bugs, game crashed once. Other than that I've enjoyed it quite a bit.. Very short, but nonetheless very good.. I recommend this game if your into building a fort, upgrading your fort, and defeating waves of monsters. Controller support is a little more difficult to aim with. I wouldnt say it hindered my gameplay that much. anyways great game. Had me interested the entire time. I survived to wave 23. Heres my gameplay.

<https://www.youtube.com/watch?v=tFOkTnDBY8k>. bla bla bla bla its a game!If you try and pick appart things in video games IDC how great the game is your always going to find something to ♥♥♥♥♥ about!!So to all those people who write reviews as if they are getting paid to be a game tester lighten up!this is by far one of the most fun rts games I have had the plusure of playing in a long time.so enjoy it if not then buy it pick it apart and be misirable LMAO!!!!!! DO NOT BUY!!! Waste of money and time!!

Patch 1.0.1 is live:

v 1.0.1 Changelog

- Removed the number on the d20 die. The dice rolling was apparently causing some confusing as some players believed it to be skill based. It's actually luck based, and is usually a 50/50 chance to have a good outcome. By removing the number until you click 'roll', this should clear up the confusion.
- Added a 'Declare War' button to the parley panel. When you declare war on other ships, you can choose to duel with the captain instead of attacking ship to ship automatically.
- Added a praying option on the Test your luck panel. Praying decreases morale by 25 , but improves your chances of a successful adventure roll. (Adventure only, not for mutinies)
- Fixed an issue where player ships could sometimes not flee from battle against other ships
- Added more helpful tips in the Survival loading screen
- Fixed a bug where the crystal ball panel would sometimes appear behind other panels
- Fixed a bug where the 'Offscreen Arrow' text still appeared on screen after player death
- Sea monsters have more health
- Increased the amount of materials and gold gained from killing sea monsters
- You can only fight each island sentinel once per game now (once it is destroyed, it is gone)
- Fixed a bug where dying in permadeath mode would take you to the pirate council

. Patch 1.0.2 is live!:

Yarr! Greetings Pirates, here's what's new in the latest version of Swords and Sandals Pirates.

- Fixed a bug where ships belonging to eliminated captains still appeared on the oceans
- Fixed a bug where sometimes captains who did not level up overnight could not visit shops
- Troop pics in survival upgrade screen now actually look like your soldiers

-
- After you have chosen all your upgrades in Survival, the upgrade panel resets so you can choose more!
 - Added the Swords and Sandals 2 town sounds for when you enter a town !
 - New music for sea monster battles
 - Fixed the timing on the narrator saying "You have gained a new island" until after the battle
 - Boss monsters in survival now have a lot less health to take into account your army is generally decimated by the time you reach them
 - Heavy troops now have 3 attack value instead of 2, making them hit more often in battle
 - Fixed a bug where reflections in battles sometimes caused a crash
 - Potential fix for disappearing buttons on island menu (let me know if this still happens in your game!)
 - Minor typos fixed across the game
 - Added a new Fullscreen toggle button on the main menu
 - Removed 'maximize' button on the app title bar (this never worked, to run the game full screen, toggle the button from the settings page or main menu!)
 - Added "Ultratus Mode" to logo - the game is also coming out on Mobile and I wanted Steam users to know the version they are playing is the Ultratus (or "Ultimate!") version of the game.
