
N/A 5- Paragraph Essay - "I've had some bad luck with this program" I've had some bad luck with this program. I started using it when I was in third grade, and since then, I haven't been very successful in school. My teacher said that when she has me come up to the board, what she sees is not good at all. It doesn't look like my handwriting; it looks like scribbles that no one could ever read. I like the program's appearance. It is very easy to use and very intuitive. The directions are easy to follow, which is another plus; I am able to get this done on my own. The keyboard layout of the program is pretty good; it isn't too small or too large. When you start, you'll see that there are three tabs: My Essays, My Notes & Settings, and Help. The help tab has worked out pretty well for me; it explains how to get started, what an essay is supposed to look like, some tips on formatting your papers and even some tips on punctuation and grammar. My main problem with the program is its writing speed. In the beginning, I only got a few minutes to write an essay, and it would take me about 20-30 minutes to finish. I've been trying to figure out why this is happening. If you think that this program has a problem, then go back and click on the help tab. It will tell you where all of the controls are and how to fix it. I hope that you understand and can fix your problems as well as mine! 1- Paragraph Essay - "I've had some bad luck with this program" I've had some bad luck with this program.
